CHINA DIECASTING - Drive the Global Market

Green · Intelligence · Technology

Developed rapidly in the past years, China has become one of the largest die casting countries in the world for its integrated industry chain and the overall fast upgrading level. With the launch of "Made in China 2025" strategy, the manufacture industry in China steps into a brand new development period. Meanwhile the die casting industry also meets the crucial period of transformation and upgrading. The Chinese die casting industry has opened its door to face the opportunities and challenges which are brought by the stable growth of the application fields such as automotive, telecommunications, aerospace, and electrical machinery industries. Green, intelligence, technology will be further enhanced in the competition worldwide.

Leading platform focusing on the Chinese die casting market

As an international trade fair focusing in the global die casting market, CHINA DIECASTING continues its success to reach a more professional level. CHINA DIECASTING 2016 covered two halls with 23,000sqm (increased 27%) gathered 295 exhibitors (total increased 15% & overseas exhibitors increased 30%), and attracted 12,072 trade visitors (increased 43%) during the three days. At China International Diecasting Congress, more than 40 speakers shared achievements of new technologies, industry information and analysis with 200 attendees.

CHINA DIECASTING 2017 will be held from 2017.7.19-21 in Shanghai New International Expo Centre (SNIEC), 2017 China International Diecasting Congress will be held concurrently, Co-Organized by NürnbergMesse China Co., Ltd. Positioning itself as the leading platform for the market, the organizer dedicates on integrating more international resources to the show, aiming at upgrading the platform to the next level.

Together with non-ferrous alloys and special casting technologies

Besides die casting, the non-ferrous casting, especially the light metal casting is emphasized in the future development of the global casting industry. More and more enterprises put their concentration on it and start business in this new sector. Meanwhile, to face the increasing demand of a professional platform in China, the organizer decided to launch China Nonferrous Alloys & Special Casting Exhibition (CHINA NONFERROUS) in 2016. The first edition attracted the leading players in the industry to participate, and was proved to be successful with the academic forums and high efficiency. The concurrent CHINA DIECASTING and CHINA NONFERROUS 2017 will again bring knowledge and exchange technologies to inspire the onsite visitors through various topics and onsite events.

Perfect Choice for Leading Companies

* Exhibitors of CHINA DIECASTING 2016

Network with International Markets

High Efficient Onsite Program

Development Forum on China Nonferrous Alloys & Special Casting Technologies

- 5 hot topics focusing on markets, trends and technologies
- Hundreds of technical reports and speeches
- High ranking participates
- Network platform

The 4th China Foundry Science and Technology Achievements Trade Fair

- Achievements display
- Project information release
- Business cooperation discussion

Best Die-casting Competition

- More than 50 die casters
- 100+ die casting products
- Authoritative experts

Match-Making Events

- Link suppliers and buyers
- Fact to face communication

Trainings

- Provide solutions
- Spread technical skills

Voices from Exhibitors

Congratulations to the success of CHINA DIECASTING 2016! No doubt it is the leading platform in the Chinese die casting industry, with the participation of the most leading companies! It proves again that FICMES is influencing the development of the industry and its importance in the Chinese die casting market. It is a wonderful gallery of new technologies and products. Idra Group exhibits our latest technology every year.

We appreciate FICMES for the hard work and the wonderful platform, and expect continuous success of CHINA DIECASTING!

Idra Group

The quantity and quality of the trade visitors are guaranteed. L.K. display its die casting machines, post-processing and automation this year, which attracted the attention from visitors. The advanced design and excellent functionality win high appraisal of our customers. We achieved a lot and do appreciate the organizer for providing this excellent platform.

L.K. Group

We participate in CHINA DIECASTING every year since Fondarex's foundation in China. The effect of the show always exceeded our expectation. As the leading exhibition in Chinese die casting industry, CHINA DIECASTING provides us with an excellent marketing platform. It is also a learning point for us. We learn from experts and other good companies in the industry. The round table forums this year were very impressive. Fondarex will continue joining hands with FICMES for an even better future!

Fondarex China

We had a lot of visitors on our stand, which showed high interest to our products. The booth was always crowded and we are overwhelmed all the time. Our new products made a successful debut and won the respect and recognition from the visitors and our customers.

BMC

Now even so shortly after the show we can already say that is has been a full success. High quality visitors, interesting contacts and last but not least a highly professional management of the show and all side events.

Review of CHINA DIECASTING 2016

23,000 m²
Exhibition space

295
Exhibitors

12,072
Trade visitors

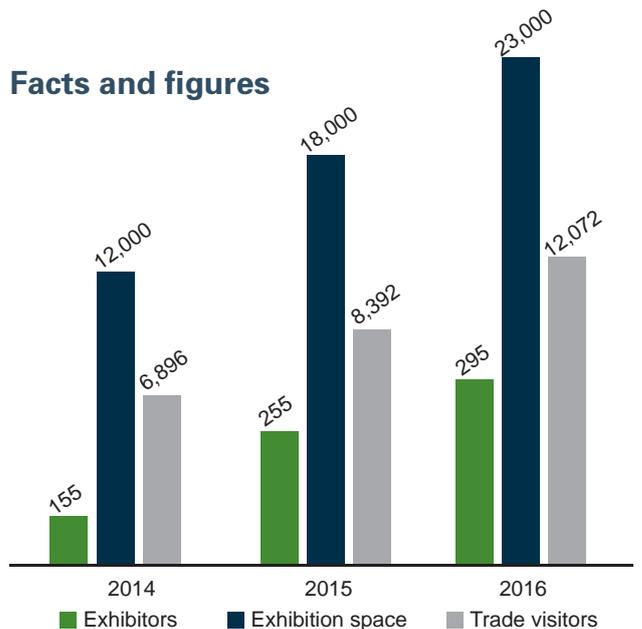

By industry category

- 50% Accessories for automobiles and motorcycles
- 23% Electronics, electrical appliance
- 17% Mechanic-electronic instrument
- 11% Metal for civil use
- 10% Electric tool
- 10% Metal for architecture use
- 8% Lighting
- 2% Toy
- 11% Others

By purpose

- 45% Purchasing equipment/castings
- 34% Collecting industrial/product information
- 29% Looking for partners
- 23% Market research
- 17% Meeting with suppliers
- 2% Others

Facts and figures

295 exhibitors from 19 countries and regions

- China
- Germany
- Italy
- France
- Switzerland
- USA
- Canada
- Korea
- India
- Malaysia
- UK
- Thailand
- Sweden
- Japan
- Spain
- Taiwan
- Australia
- Hong Kong
- Slovenia

By job function

- 21% Salesman
- 21% Technical design engineer
- 20% Purchaser
- 19% Manufacturer
- 15% Administrator
- 10% Marketing staff
- 2% Others

By job position

- 40% Mid-level management
- 30% Staff
- 22% High-level management
- 16% Entrepreneur/Management Board

Overseas visitors

* Top 10 countries and regions

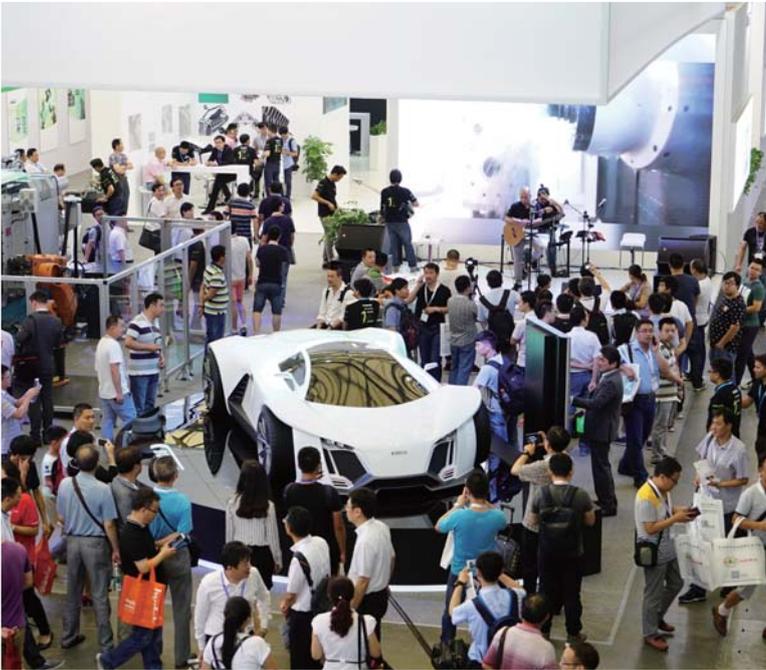

- Korea
- Thailand
- Malaysia
